

## PINES Upgrade v 2.7 - 2015

Our library system has completed testing for Evergreen, Version 2.7. Checklists indicated below will be returned directly to PINES staff at GPLS.

<input type="checkbox"/>	Cataloging
<input type="checkbox"/>	Circulation
<input type="checkbox"/>	Local Admin
<input type="checkbox"/>	Kids Catalog
<input type="checkbox"/>	OPAC
<input type="checkbox"/>	Peripheral Devices (printers, scanners, etc)
<input type="checkbox"/>	SIP/Third Party Connection

Our library system will decline testing for this upgrade.

I understand that software testing does not guarantee that all issues will be caught and resolved prior to the upgrade.

I understand that if my library system declines testing, my library is at greater risk for issues on the go-live date.

Evergreen has introduced the Library Pages function to associate an informational web page with a library. When set, this link in the copy table on the record details page displays the library's hours, contact information (telephone and email address), mailing address, website URL and branch relationship. Our library system has provided updated information and verified that this information displays correctly.
