

Proposed circulation modifier reorganization 2021

Proposed new Circulation modifiers:

- audiobook-ff (use currently restricted to pilot libraries)
- video-0
- video-2
- video-2-ff (use currently restricted to pilot libraries)

Proposed Circulation modifiers to be removed from PINES configuration

- | | |
|----------|------------|
| av | e-book |
| cd | record |
| cd-ff | video |
| dvd-0 | video-mid |
| dvd-2 | video-long |
| dvd-2-ff | |

Currently, PINES circulation modifiers for audiovisual materials are a combination of format and content. I am proposing changing the format-based circ modifiers to content-based ones. Creating these new circulation modifiers and retiring the format-based ones would lessen the number of circulation modifiers used by PINES libraries by eight. It would prevent the need for the creation of additional circ modifiers if a new format for these materials is created in the future. It would also streamline entries in the annual report since all PINES libraries would use the same circulation modifiers for the categories counted in the report.

Circulation rules would be inherited by the new circulation modifiers. Fines-free circulation modifiers currently restricted to pilot libraries would remain restricted.

Under this proposal, the circulation modifiers for audiovisual material would be:

music and music-ff	physical music sound recordings	Existing
audiobook and audiobook-ff	physical spoken word sound recordings	audiobook – Existing audiobook-ff - New
video-0, video-2, and video-2-ff	physical recorded visual material	New

Circulation rules for audiovisual circulation modifiers

Circ mod	Recurring fine (Normal)	Recurring Fine (Low)	Recurring Fine (High)	Short Duration	Normal Duration	Extended Duration	Renewals
audiobook	0.20				14 days		2
audiobook-ff	none				14 days		2
music	0.20				14 days		2
music-ff	none				14 days		2
video-0	0.50	0.20			7 days	14 days	0
video-2	0.50	0.20			7 days	14 days	2
video-2-ff	none				7 days	14 days	2

Circulation modifier definitions

audiobook

Nonmusical sound recordings. Can be audiocassettes, compact discs, MP3 players or other nonprint physical media designed to be played back on an audio device. A 007 field should be included in the MARC record to define specific type. Not holdable outside owning library system.

audiobook-ff

Nonmusical sound recordings. Can be audiocassettes, compact discs, MP3 players or other nonprint physical media designed to be played back on an audio device. A 007 field should be included in the MARC record to define specific type. Not holdable outside owning library system. Accrues no fines. Use is currently restricted to libraries participating in the pilot project to determine feasibility of being fines free.

music

Music sound recordings in any format. Can be audiocassettes, compact discs, MP3 players or other nonprint physical media designed to be played back on an audio device. Not holdable outside owning library system.

music-ff

Music sound recordings in any format. Can be audiocassettes, compact discs, MP3 players or other nonprint physical media designed to be played back on an audio device. Not holdable outside owning library system. Accrues no fines. Use is currently restricted to libraries participating in the pilot project to determine feasibility of being fines free.

video-0

Projected video/media on any physical format. A 007 field should be included in the MARC record to define media format. Items with this circulation modifier are not renewable. Not holdable outside owning library system.

video-2

Projected video/media on any physical format. A 007 field should be included in the MARC record to define media format. Items with this circulation modifier are renewable twice. Not holdable outside owning library system.

video-2-ff

Projected video/media on any physical format. A 007 field should be included in the MARC record to define media format. Items with this circulation modifier are renewable twice. Not holdable outside owning library system. Accrues no fines. Use is currently restricted to libraries participating in the pilot project to determine feasibility of being fines free

Current counts and Proposed actions

Circ mod	Total Count	Proposed action
audiobook	244,466	no change
av	92	Libraries evaluate and edit to appropriate circ mod. Circ mod would be removed from configuration.
cd	64,715	Libraries evaluate and edit to appropriate circ mod with possible assistance of PINES staff. Circ mod would be removed from configuration.
cd-ff	3,346	Library evaluate and edit to appropriate circ mod with possible assistance of PINES staff. Circ mod would be removed from configuration.
dvd-0	370,093	PINES staff edit to video-0
dvd-2	327,381	PINES staff edit to video-2
dvd-2-ff	28,522	PINES staff edit to video-2-ff
e-book	0	Circ mod would be removed from configuration.
music	23,961	no change -- however library staff should evaluate for scores and change those to book
music-ff	2,009	no change -- however library staff should evaluate for scores and change those to book
record	97	Library staff change the item to music. Circ mod would be removed from configuration.
video	52,734	Library staff will need to determine which video circ modifier is preferred and edit with assistance of PINES staff. Circ mod would be removed from configuration.
video-long	11,173	Library staff will need to determine which video circ modifier is preferred and edit with assistance of PINES staff. Circ mod would be removed from configuration.
video-mid	9,486	Library staff will need to determine which video circ modifier is preferred and edit with assistance of PINES staff. Circ mod would be removed from configuration.
