

Email sent by Elizabeth McKinney on February 2, 2010 to the PINES Library Directors and Subcommittee

PINES Library Directors and Subcommittee Members,

This workflow (<http://pines.georgialibraries.org/longoverdue-workflow-chart>) reflects current policy (see links below) and the vote to develop LONGOVERDUE in Evergreen. If this is an accurate reflection of that vote, we can go forth and have it developed. However there is current confusion over current policy around lost and interpretation of the previous vote to develop LONGOVERDUE. If either of these are revisited, it will affect the attached workflow. We have 2 choices

- 1) If the workflow is accurate and reflects policy vote, we will go forth with development.
- 2) If you would like to revisit the policy on Lost or the vote on LONGOVERDUE, we can discuss this during the upcoming PINES Executive Committee meeting. But please keep in mind how it will affect the current Workflow.

Watch the subcommittee discussion on the forum.

As a reminder

LOST = manual setting set by staff

LONGOVERDUE = automatic change at 180 days by the software
